## **Part I**

# **Introduction**

Terkars is a language invented to let you speak like a bango. In order for that, it ought to be flexible for manic and otherwise weird thinking, it should allow more formality if the need arises. It also has good morphology so that you can make big words out of little words when you feel like it.

## 4 Nouns

### 4.1 Cases

Nouns have ten different cases for different uses, which are:

**Subject, Polite** ama

**Subject, Past Tense** um

**Subject, Present Tense** om

**Object, Polite** arsom

**Object, Past Tense** ur

**Object, Plurar, Past Tense** ure

**Object, Present Tense** ars

**Object, Plural, Present Tense** arse

### 4.2 List

**gam** I, me

**val** you

**terk** world of bango in which the ordinary people only appear like they are ghosts.

**beamgou** creatures that are fully alive and free in their mind. When this happens, the terk world is superimposed over the ordinary world for them. Even though there are mosts, that does not mean that all bangos are nice, because they can also be not nice, and they are not nice in a worse way, because at least mosts are not that smart or anything.

**most** a nuisance to a bango that appears to them not like a ghost, but not a bango. There are a lot of different kinds of them and they can be all kinds of different living things, but also not living things also. In english these are called weirds, and the ones that are living things are called dayweirds, and the other ones are called nightweirds, and they are worse. A good example of a day weird is football players, or a rabid dog. Night weirds are not so describable, but I think that many of them would have lines coming out of them like a blue-bottle, and maybe like spiders also. Remember, it is pronounced moss-t.

**veads** dog, and probably a wolf too, however, I don't think this word is entirely the same as when I say dog in english, because I'm usually talking about a kind of being a bango which happens when there is a big storm. They have 6 nipples though.

**sos** snake

**kaves** smoke

**sus** fly

**somo** water like in a body of water **gos** wire, antenna like either on an animal or a machine

**treb** hat

**gebel** a period of time

**sot** ghost

**tob** being, body, physical form

**vob** vine

**dot** nut, seed

**stas** flower

**ord** spider. I do not like spiders at all after reading the poem that gets called spleen in english by charles baudelaire.

**lestes** a web like a spider makes

**mola** head, mind

**lat** eye

**kabt** shell, armour

**red** side, section

**gead** sadness, the jungle. There is more info on this later on in the book.

**darde** language

**blet** tooth

**sares** cloud

**taged** thunder, lightning

**sud** blood

**stem** feeling

**boler** an idea

**emb** understanding, like where you have understanding of a situation

**tem** leaf

**bet** gun, cannon

**gob** location, position

**es** light

**bavm** friend

**todmemom** the act of dying, death

**ror** wife

**gor** husband

**tokt** order, law

#### 4.2.1 Numbers

Numbers are in base 8, just for the hell of it. Because of that,  $8_{10} = 10_8$  is saso,  $10_{10} = 12_8$  is savae, etc.

**0** so

**1** sa

**2** vae

**3** rom

**4** lo

**5** dat

**6** bao

**7** sao

## Part IV

# Morphology

## 8 Nouns

You can turn a verb into a noun referring to the action of doing that action to something by adding mem between them, and then mem on the end, and then adding noun classes after that like: telememtovotmemom mor gorad ((the act of living here) is great). To just have the noun of an action go action-mem-class. like todmemom is death.

## 9 Adjectives

To make adjectives that are just the opposite of another adjective, just add ur to the start.

To make an adjective that means taking the characteristics of a noun, just add ad straight onto the classless version.

To make an adjective that means you are doing a verb, add the mem, and put ad after it, to say that they are not doing it, keep the memad, but put ur at the start.

To say something is very adjective, repeat the ad like goradadad. to make something less of the adjective, remove the d, like gora.

## 10 Verbs

You can create a verb describing the action that a thing does by adding el to the end of the noun. You still add mem when doing it.

to become an adjective, just go adjective-mem (no ad at end).

## 11 particles

To make a number position word, put the number, and then asar at the end. Like saasar means first.

When my eyes turn grey and it seems that a spider has woven a web inside my brain. I hide beneath this shell silently, not even feeling enough sadness to excite me.

Yeah you notice here that saying I am this is sort of like saying I promise this.

**urtomad valom salodmem dormemtovotmemars** *friendly you regret doing-that* You're going to regret doing this mate.

Using adjectives on the subject of the sentence is ok to mean things, like here it's being rude by ironically calling him a friend.

## Part VI

# Bango Extremity Spell

## 12 the Jungle

The easiest part of the Terk world to enter is the jungle because it is the saddest, and the quietest, but it still is not always possible. However, I think that you can easily superimpose the jungle lounge into the world if the world is right and your brain is ready, even when it is around the bottom of tooth section which I describe next.

Possibly there are techniques with which you can get to the Jungle but I dunno right now.

## 13 About Bango Extremity and Spells

It is not easy to be a bango at all times I think, since you have to be filled with aliveness and it is kinda of like a sawtooth wave where it goes up very fast and then it goes down again slowly. Therefore, I think that in order to transform from the bottom of the tooth into the top of the tooth bango spells would probably be useful, so I shall provide one here, however, they must always be treated with a great degree of extremity, otherwise they will break.

I think that for optimal use, you should wear blue and black for 24 hours before the activation of the spell, and after you should wear red, or another garish and obnoxious colour. If you can't go outside, a good place to activate the spell would be in your wardrobe, or under your bed would actually be quite good. Read it once very quietly, then read it in a normal volume, then change into your garish clothes and read it as loudly as you possibly can and then you will surely be a bango. You absolutely have to yell it the last time or it is already doomed to fail.

## 14 Vaedsom Gedarmem Somoarse
